## **FY 2030**

Aim to have products and Services certified to sustainable product account for our 30% or more consolidated net sales.

# **Upgrade to the next level**

Presenting tropically designed air conditioners from General that can deliver exceptional cooling even at an extreme temperature of 55°C, and are suitable for cooling large sized rooms with its 25m long reach air flow. They're also capable of meeting higher energy efficiency levels (ISEER) as per the new regulations.

Not just that, they can cool even at extremely low and high voltages, and they're built to last longer. So choose wisely and upgrade to the next level of performance.

5. ....

#### 

1.05.47.99

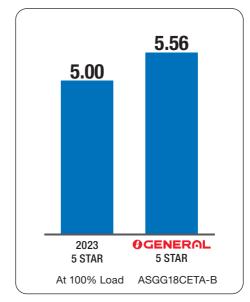

Presenting the ultimate air conditioner from General, designed to deliver exceptional cooling at extreme temperatures with CPTA (Cooling Power for Tropical Application) technology, and suitable for cooling large sized rooms with its 25m long reach airflow. At the same time, delivering a highest part load efficiency of 6.44 EER, and capable of meeting the energy efficiency level (ISEER) as per new regulation. What's more, every General is built to last longer. So choose wisely, to experience the next level of performance.

# **OUR JOURNEY...**

JAPAN Head Office - R&D Center

Fujitsu General Central Air Conditioner (Wuxi) Co. Ltd.

Fujitsu General (Thailand) Co. Ltd.

Fujitsu General creates high-quality and environment-friendly products that provide good comfort in accordance with our vision to 'Create a comfortable Environment' by utilizing air conditioning technology and creativity we have fostered over many years.

### High Quality Development and Production Environment

The Headquarter & R&D Centre is equipped with a wide range of testing equipment envisioning a variety of operating conditions. This includes a testing tower with a 60m height difference for buildings. We provide high quality and reliable products that meet the customer's needs from all over the world through our advanced R&D centres and manufacturing facilities.

# ADVANCED R&D FACILITY

Shower Test Room

Vibration testing

All Fujitsu General factories have acquired ISO 9001 and have built a quality control system common around the world. High quality products are offered to all over the world based on stringent quality inspections.

#### **Certifications - ISO**

ISO 14001 is the standard defined by the International Organization for Standardization (ISO) related to environmental management systems. Fujitsu General America, Inc. has been acknowledged by an internationally accredited compliance organization as having an appropriate program of environmental protection procedures and activities to meet the requirements of ISO 14001. The air conditioners manufactured by Fujitsu General have received ISO 9001 series certification for quality assurance.

## RoHS Compliant

Fujitsu participates in the RoHS Directive, which is the Restriction of Hazardous Substances in electrical and

electronic equipment. It is an EU directive intended to protect the environment by forcing manufacturers to eliminate or severely curtail the use of cadmium, hexavalent chromium, and lead, in all products from automobiles to consumer electronics.

#### **Receiving inspection**

Parts procurement requires a supplier's test report. European regulation RoHS inspection is also performed by a special in-house test department. A number of inspections are performed especially on main parts to remove defective products.

### Stringent product quality inspection

Stringent quality inspection is carried out at all production processes. High quality is maintained by stringent checks by inspectors and repetitive inspections.

#### **PARTS & MATERIAL**

## **HIGH PRODUCT QUALITY ASSURANCE**

## **ENVIRONMENTAL** MANAGEMENT **SYSTEM**

The Fujitsu General Group strives for business activities that achieve harmony between contributing to protecting the global environment and company activities while making environmental protection activities, an important issue in company management. The Fujitsu General Group is working to improve its environment friendliness by building an Environmental Management System (EMS)-taking environmental protection measures throughout the product life cycle of materials procurement, product development and design, manufacturing, and recycling; and by taking the environment into consideration during business activities such as saving energy, resources and reducing waste.

## INNOVATION IN TECHNOLOGY

#### **3** High output BLDC fan motor

Produces high power, wide operation range, and high efficiency.

- Increase in motor efficiency
- Lesser vibration
- Lower noise

The cold air discharged is directed upward by the special designed louvers, which achieves the coanda airflow along the ceiling, producing long reach airflow of 25m\*, making it possible to cool every corner of a big room immediately.

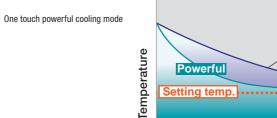

### **Powerful Operation**

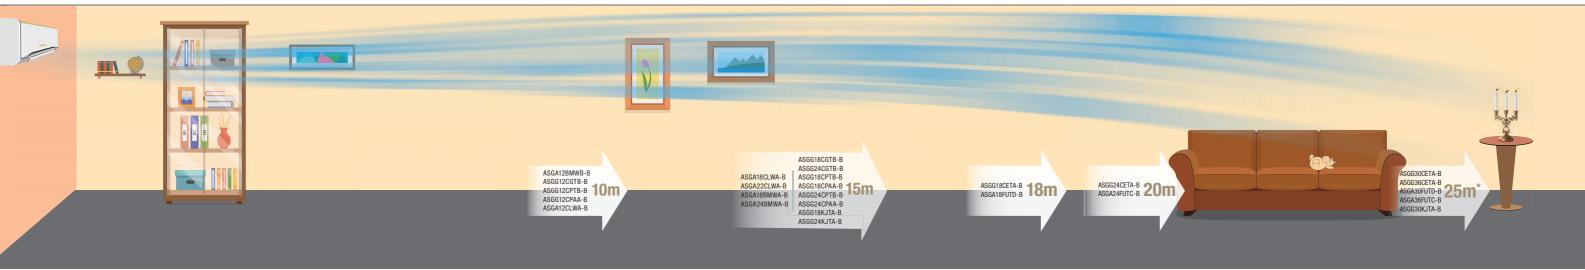

Thirty minutes of continuous operation by maximising airflow allows the temperature to reach optimum levels. Rapid cooling makes the room comfortable quickly.

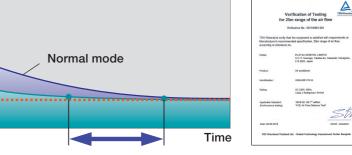

# **25 METRES** LONG REACH **AIR FLOW**

Cooling time in powerful mode is shorter than in normal mode

Certified 25m Airflow

#### **Powerful Cooling**

General Air Conditioners are tropically designed to perform at ambient conditions as high as 55°C. Housed in larger outdoor units, the machines carry high BTU hyper-tropical compressors with large copper heat exchangers and large propeller fans to ensure powerful cooling.

Tropical Product Design

Eco-friendly Refrigerant

## **CET Series**

CET series models achieve over 80% cooling capacity even at 52°C (18/24k models) by using larger indoor/outdoor units with hyper tropical compressors, and higher airflow to improve cooling performance at higher temperature. They can also operate even at 55°C.

#### CGT Series

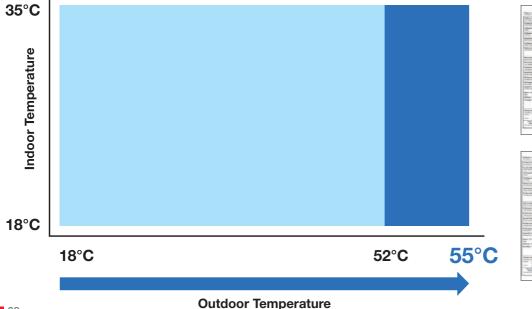

CGT series models are able to achieve over 80% cooling capacity even at 49°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can also operate even at 55°C.

#### CPT / CPA / CLW Series

CPT, CPA and CLW series models achieve over 80% Cooling Capacity even at 46°C by using a new heat exchanger designed to have high cooling performance. They can also operate even at 55°C (CPT / CPA models).

#### **KJT Series**

KJT series models achieve over 80% Cooling Capacity even at 49°C (18/24k models) by optimizing the components for high cooling performance. They can also operate even at 55°C.

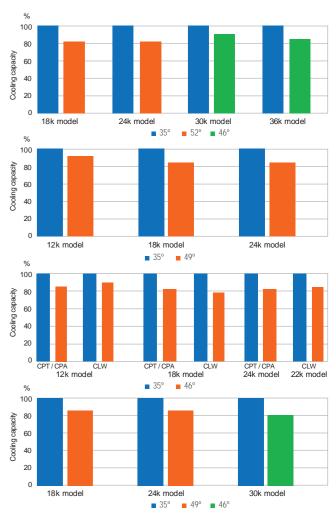

22 Note: Available in select models.

Certified 55°C operation

# **COOLING POWER FOR TROPICAL APPLICATION - CPTA TECHNOLOGY**

### **ISEER Upgrade**

Top of the line energy efficiency of ISEER 5.56 that exceeds 5 star rating requirement as per BEE, making it highly energy efficient.

Indian Seasonal Energy Efficiency Ratio (ISEER)

### High Energy Saving

Top class energy saving is achieved by high efficiency lambda heat exchanger, large cross flow fan, new efficient compressor, large propeller fan and R32 refrigerant

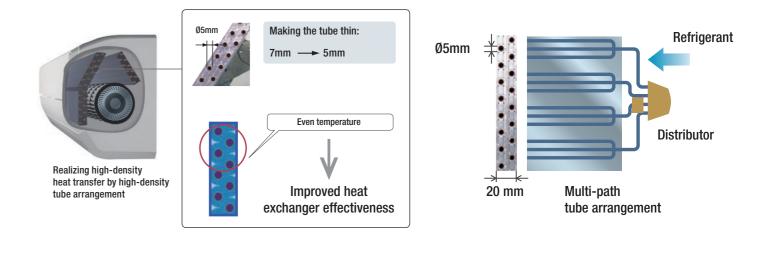

Large heat exchanger

Large propeller fan

### High Density Multi-Path Heat Exchanger

Heat transfer ability is substantially improved by the high-density heat exchanger and multi-path tube arrangement. High performance grooved piping with expanded heat exchanger area is used for better heat transfer.

# EXCELLENCE IN ENERGY EFFICIENCY

Advanced Hyper Tropical Rotary Compressor

Gas leak protection and low voltage protection OLP (Over Load Protection) device installed

High durability crankshaft with hardness improved by adding a coating

High durability rolling piston with hardness improved by changing the material

Eco-friendl Refrigeran Advanced Hyper Tropical Rotary Compressor

**HYPER** 

TROPICAL

**DESIGN** 

Complete protection against abnormal temperature rise thermal protector and abnormal pressure rise.

High efficiency, high-output torque motor. Torque improved by increasing the thickness of the laminated core and improving the coil winding

High durability vane. Surface hardness increased

Designed & developed by Fujitsu General

### Hyper Tropical Spec

Super eco-friendly Compressor based on Eco-friendly R32 refrigerant designed for higher ambient temperature of 55°C.

Super powerful 10% more capacity than old models r under overload condition.

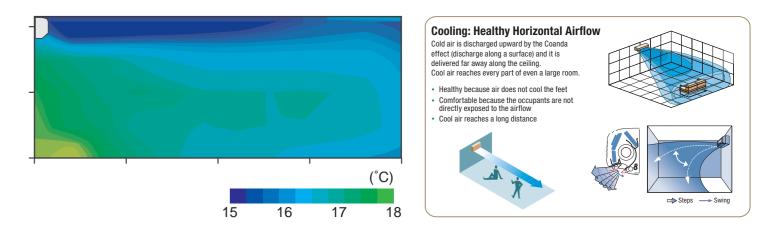

Super low voltage operation Our Hyper Tropical Compressor can be operated even at a low voltage of 155V.

tion Super Hi-Efficiency Fulfills star rating requirements of 2022. Super quiet compressor Reduced compressor noise due to better lubrication at high tempreture and frictionless parts along with compressor insulation jacket.

### Coanda Airflow

With advanced airflow technology, General provides powerful airflow and better air distribution for corner to corner cooling. The cold air discharged is directed upward, which achieves the Coanda airflow along the ceiling, producing long reach airflow.

## OPTIMISED AIR FLOW

27

### Saves Energy Throughout the Year

By making all the motors DC, electricity loss is decreased and power consumption is substantially reduced. In addition, high-speed fan motor rotation is possible, heat exchange efficiency is increased and annual power consumption amount is saved by increasing the airflow.

### **DC Twin Rotary Compressor**

The high efficiency DC inverter type twin cylinder rotary compressor is used for our product range. It achieves higher energy efficiency compared with similar compressors by optimizing the structure inside the compressor.

### **DC Fan Motor**

DC fan motor produces high power, wide operation range, and high efficiency.

Wide high efficiency range DC rotary compressor Note: Available in select models.

Inverter **Control Base** 

**DC Compressor** 

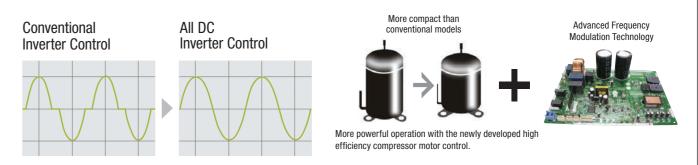

DC Fan Motor

### Sine-wave DC Inverter Control

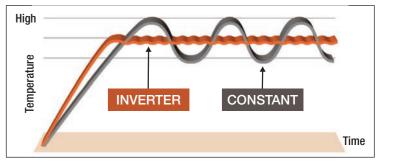

High efficiency operation is realized by using sine wave DC inverter control. This promotes the effective use of the input power supply to attain high performance.

### Advanced Frequency Modulation Technology

Advanced Frequency Modulation (AFM) Technology reduces the effects of magnetic flux by vector control technology, and improves the efficiency of the compressor by increasing its maximum speed and decreasing its minimum speed. With this technology, further miniaturization, higher efficiency and better performance is attained.

# ALL DC **INVERTER TECHNOLOGY**

### What is an INVERTER air conditioner?

INVERTER is an equipment that controls the electrical voltage, current and frequency of the compressor motor in an air conditioner.

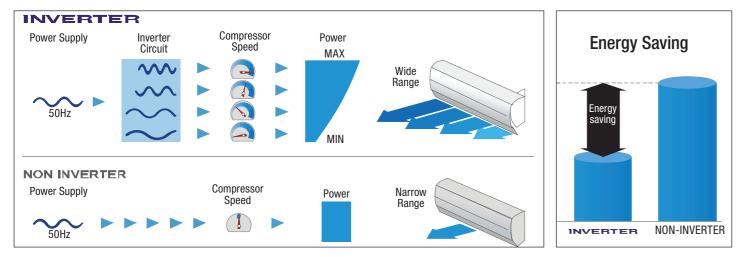

An INVERTER air conditioner changes the speed of the compressor by varying the frequency of the power supply to give superior cooling.

When an INVERTER air conditioner is started, the compressor runs at high speed for quick cooling. But once the set temperature is reached, the air conditioner

enters an 'energy saving mode' by reducing the compressor speed. Thus, effectively reducing its power consumption in order to save energy.

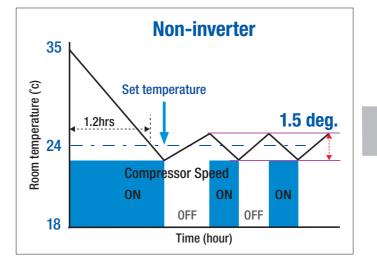

### **Full Inverter Technology**

General Inverter Air conditioners are built with compressors with advanced frequency modulation technology that run at speeds as low as 25% to as high as 110% when quick cooling is required, and consume less power under part load conditions.

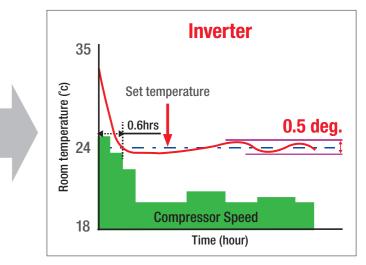

### **Faster Cooling and Comfort Control**

Inverter ACs take nearly half the time to reach the set temperature and precise control of room temperature is also attained.

Starting point: Set temperature: 24°C, Operation Time: 3 hours, Room Inside: 35°C, Outdoor: 35°C (For 12000BTU/Hr model)

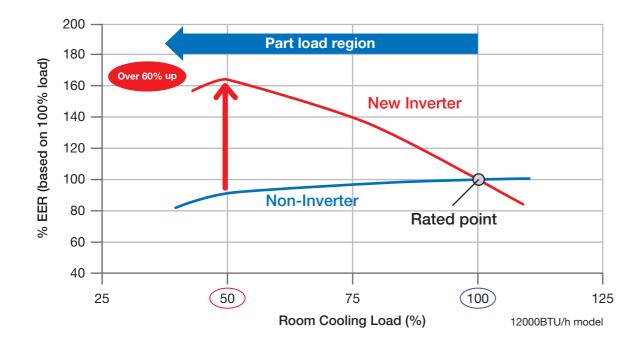

# ALL DC INVERTER TECHNOLOGY

### **Part-Load Operation**

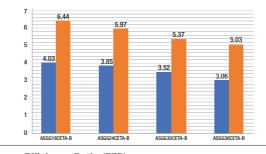

In over 80% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity. We focused on high seasonal efficiency with an all DC inverter control and high efficiency technology.

### Part-Load Efficiency

More power saving can be achieved by these Inverter air conditioners as they operate with higher efficiency under part-load conditions.

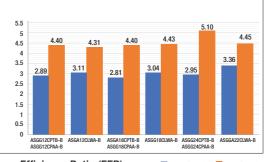

#### 50% Load Efficiency for CET Series

WIDE OPERATING VOLTAGE RANGE

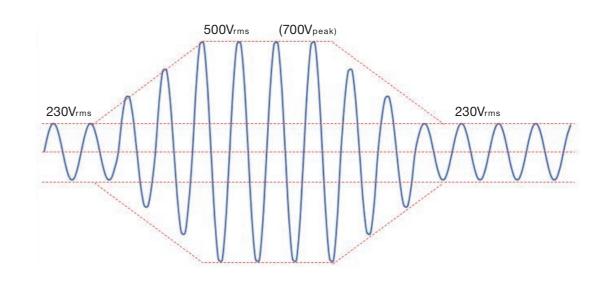

### Extreme Voltage Range (155V~280V)

The upper limit of the operating voltage range is further increased to accommodate unstable voltage conditions. Additionally, high voltage safety protection is added to make the PCB more resilient.

### Withstands High Voltage at 700V

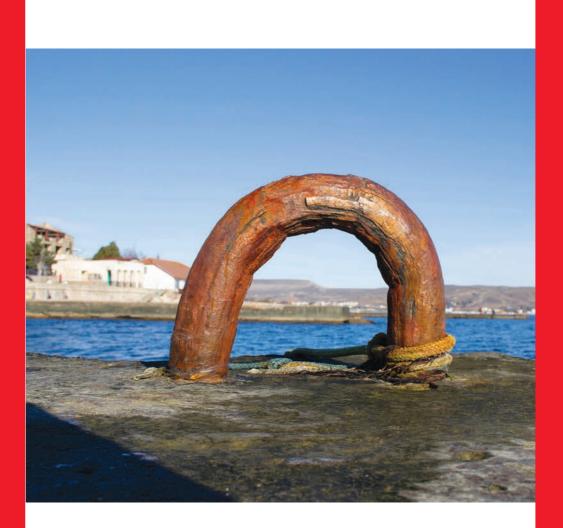

The newly developed PCB is designed to withstand high voltage upto 700V. The design is highly robust and provide additional protection to the PCB.

## HIGH VOLTAGE PROTECTION

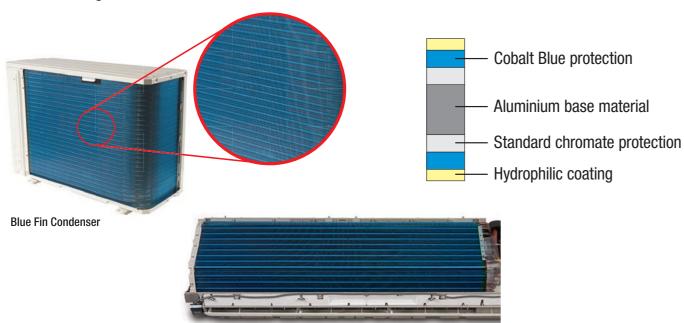

## BLUE FIN CONDENSER & EVAPORATOR

### Anti-corrosion Heat Exchanger with Blue Fin for long life

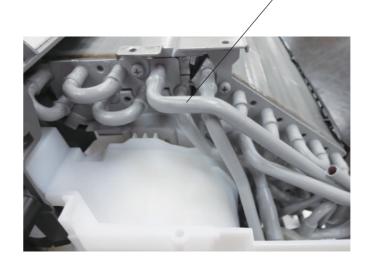

Blue fin treatment of the condenser and evaporator offers improved corrosion resistance and longer life of heat exchanger. Adoption of cobalt blue coating for the fins in the heat exchanger provides protection against rust and salt damage.

### Anti-corrosion Copper Heat Exchanger

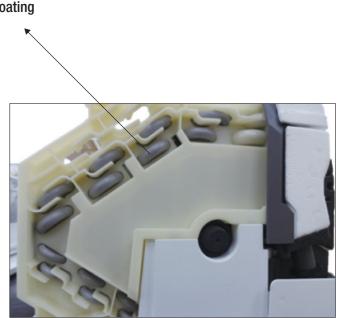

The copper heat exchanger in the Indoor unit offers high resistance against corrosion of the evaporator coil with an anti-corrosive epoxy resin coating.

**Epoxy Resin Coating** 

Blue Fin Evaporator

## ANTI CORROSION EVAPORATOR

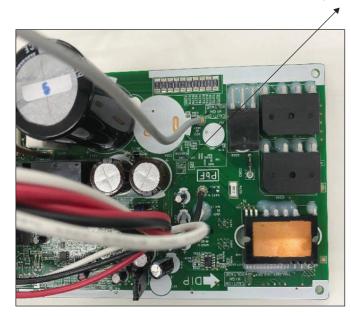

HIGH DURABILITY PCB

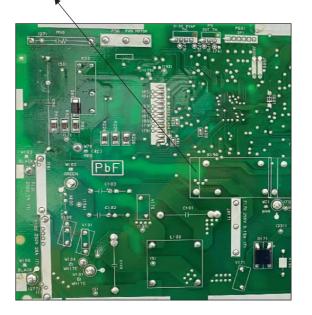

### Silicon Coated PCB

Special Silicon coating on the PCB protects the surface from dust, dirt, water and humidity ensuring long life and smooth operation.

Special Silicon Coating

### PM 2.5 Filter

Cleans the air by catching particles as small as 0.3  $\sim$  2.5  $\mu m.$ 

- PM 2.5 is a general term for micro-particulate matter less than 2.5 μm.
- Life of filter: 6 months
- Additional PM 2.5 filter part number: CET series models & ASGG30KJTA-B: UTR-FA16-6 CGT series, CPT/CPA series & ASGG18/24KJTA-B models: UTR-FA16-4
- Note: PM 2.5 filter is available in CET & CGT series models. PM 2.5 filter is an optional part for CPT series models. Required to install two filters per unit.

### How to install the filter

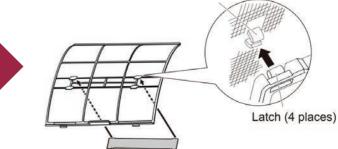

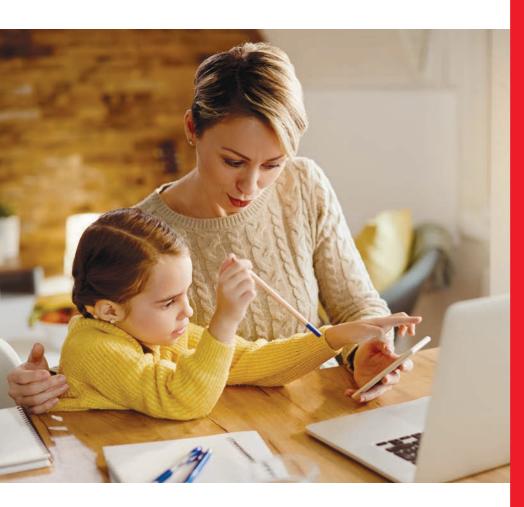

Air cleaning filter holder

## PM 2.5 FILTER

#### Hook (4 places at the rear)

## GROUP **CONTROLLER\***

\*Optional

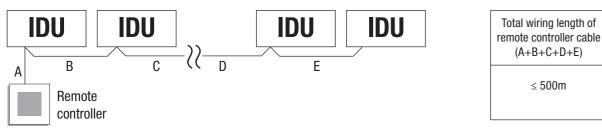

Cross section

of cable

0.3~1.25 mm2

### **Group Control System**

A number of indoor units can be operated at the same time using a single wired remote controller. When connecting different types of indoor units (such as wall mounted, cassette, duct or other types), some functions may be restricted. Connect multiple indoor units in a system with a total wiring length of remote controller cable upto 500m.

Note: 1. Group control cannot be used together with Wireless LAN adaptor. If IOT function is enabled, group control is not possible. 2. Group control feature is available in CET, CGT, CPA and KJT series models.

### **Group Remote Controller**

High visibility and easy operation. Room temperature can be accurately controlled using the built-in thermo sensor.

Communication kit UTY-TWRXZ2 is necessary for installation. Non-polar 2-core wire to be used for connection.

≤ 500m

Wired Remote Controller UTY-RLRG

### Self Diagnosis

Enables automatic error detection in the unit for easy trouble shooting. When an error is detected, the error code number can be checked using the remote controller display to identify the issue. The lamp on the indoor unit will output error codes by way of blinking patterns.

### How to use Self Diagnosis

If []] and [④] blink while [凸] is blinking fast on the indoor unit, check the error code. The error code is 2-digit numbers or characters.

1. Press down  $\begin{bmatrix} TEST \\ RUN \end{bmatrix}$  for more than 5 seconds.

The remote controller will enter to the Service check mode and "--" will be shown.

2. Press ∆SELECT ∇SELECT to change the shown error code. By pressing and holding, the error code changes by every 0.5 second. The indoor unit emits 1 short beep each time the error code changes. When the corresponding error code is shown, the indoor units emits multiple beeps and all the indicator lamps on the indoor unit blink.

(Max.2 min/cycle)

To finish the Services check mode, press. (b) The remote controller will return to the original display. Tell the error code to authorised service personnel when consulting them. If the indoor unit emits multiple beeps at "00", no error is detected.

Note: Available in select models.

## SELF DIAGNOSIS

The characters used for error code

L	J	P	Р	Ц	U			

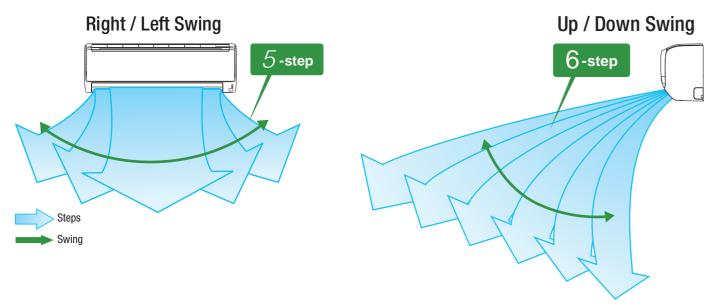

## 3D DOUBLE AUTO SWING

## 3D Double Auto Swing

30 Step Control

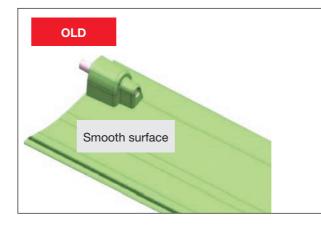

A combination of right/left and up/down directional swing airflow 3-dimensional air direction control with 30 unique configurations, which enables precision wind direction control for corner to corner cooling.

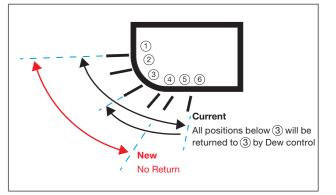

Note: Available in CET series, KJT series, FUT series, 18/24CGTB-B, 24CPTB-B and 24CPAA-B models.

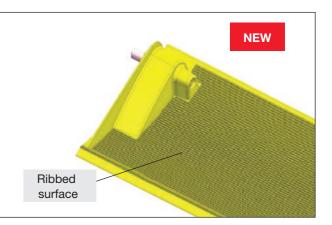

### **Dew Drip Prevention**

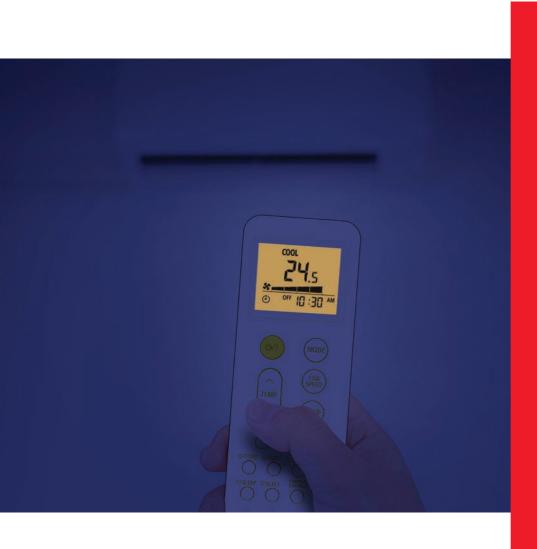

The indoor unit louver has been redesigned with a ribbed surface to have less possibility of dew condensation on it. There is an option of disabling the louver return function in the new models.

## ANTI-DRIP DESIGN

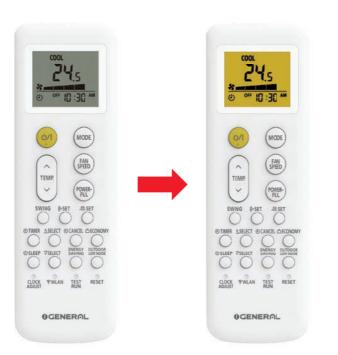

## Backlight System

Backlight display on wireless remote controller enables easy operation in a darkened room.

## 0.5°C Precision Temperature Control

Precision temperature control allows setting the desired temperature in increments of 0.5°C for more accurate temperature setting.

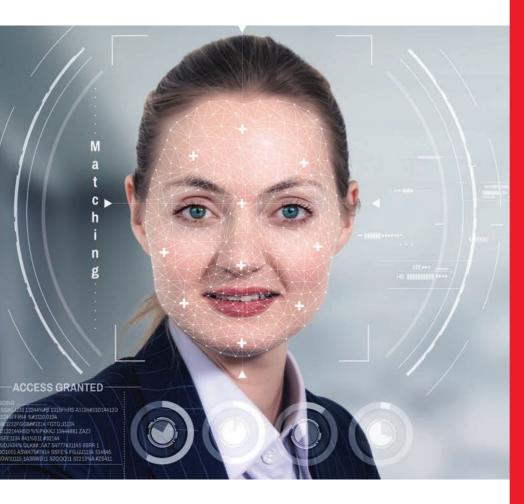

BACKLIT

REMOTE

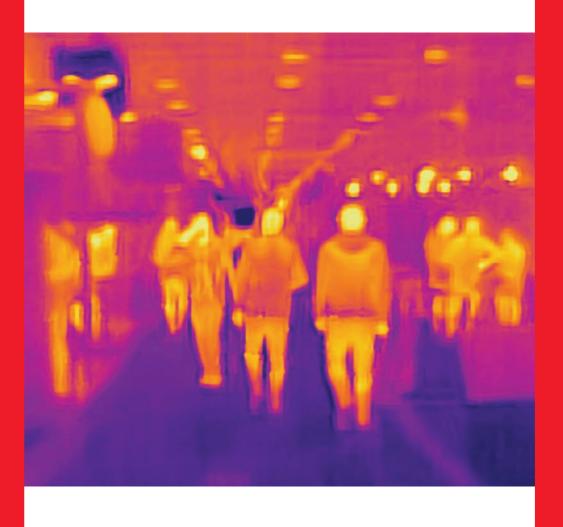

DISPLAY

## PRECISION TEMPERATURE CONTROL

## HUMAN SENSOR

### Energy saving by Human Sensor

Human sensor catches movements of people in a room, and operates with lower capacity if there is no one in the room for approximately 20 minutes, enabling additional energy saving. When people come back to the room, it automatically returns to previous operating mode.

### Maximum Comfort with Sensor Function

The built-in temperature sensor inside the wireless remote controller continuously takes a thermal scan of the room. When sensor function is set, the remote controller will send the detected ambient temperature to the indoor unit controller and the unit will automatically adjust the indoor temperature according to the detected ambient temperature.

Please place the remote controller near user when this function is set. Note: Available in CLW and BMW series models.

## SENSOR FUNCTION

## TEMPERATURE DISPLAY

## Indoor Temperature Display

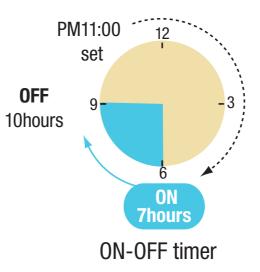

The Temperature display setting on the remote controller can be used to see the indoor set temperature and indoor ambient temperature on the indoor unit's display.

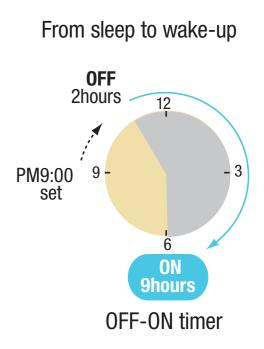

## Integrated ON – OFF Timer

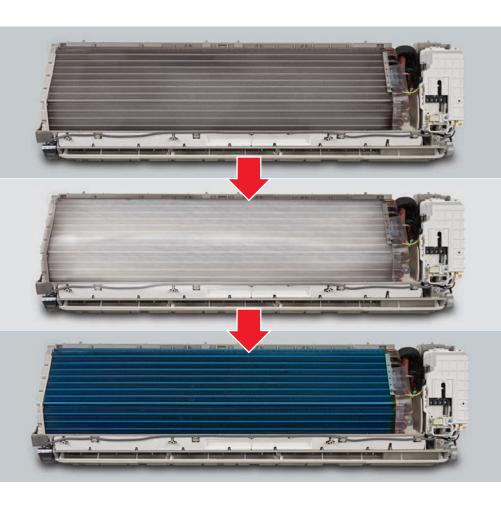

You can set an integrated ON-OFF or OFF-ON timer that's suitable for your lifestyle. Setting time: Adjust timer setting 1 minute at a time, eg. 18:30, 31, 32...)

## From wake-up to go to work

Note: Available in CLW and BMW series models.

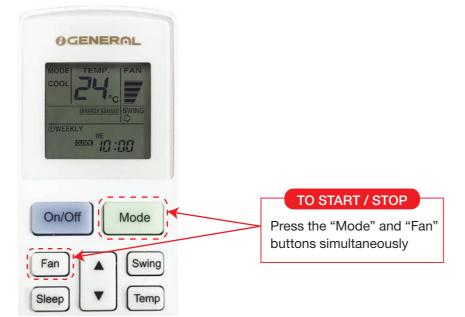

## COIL CLEANING FUNCTION

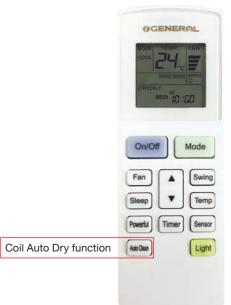

## **Coil Cleaning Operation**

This function can be used to clean the Indoor heat exchanger. The cold refrigerant is pumped into the heat exchanger and the moisture on the outer surface freezes as a result. The Indoor unit fan then runs at full speed melting the frozen layer and flushing out the water along with dust and other impurities.

## Mold Prevention by Coil Auto Dry Operation

This function can be enabled by pressing the Auto Clean Button on the remote controller. Once this fuction is enabled, the indoor unit runs for some time to dry the evaporator coil every time the unit is switch off using the remote controller. This prevents mold formation on the evaporator coil and keeps it dry.

# COIL AUTO DRY FUNCTION

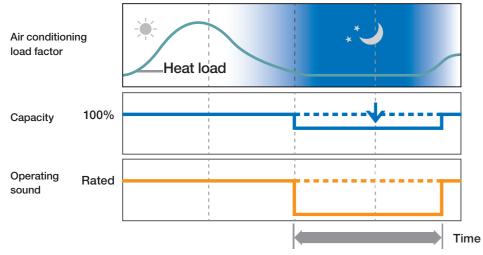

## **OUTDOOR UNIT** LOW NOISE **OPERATION**

## **Outdoor Unit Low Noise Operation**

The Outdoor unit low noise operation lowers noise from the outdoor unit. During this operation, the rotation speed of the compressor decreases and the outdoor unit fan rotates slowly. The setting is preserved even if the air conditioner is turned off.

Quiet priority low noise mode

## **10°C Heat Operation**

10°C Heat operation maintains the room temperature at 10°C, so as to prevent the room temperature from droping too low when not occupied. Thereby, comfort level is enhanced by controlling the room temperature quickly after returning home as well as reducing power consumption while nobody is at home. Also, when nobody is at home for a long time, the room temperature can be maintained by "10°C heat" function to prevent furniture from freezing.

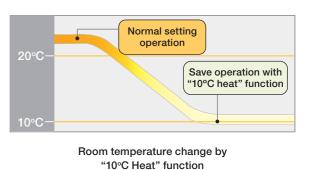

Note: 1. Available in KJT series models. 2. If the wired remote controller (optional) is connected, this function is restricted.

Note: 1. Available in KJT series models.

2. If the wired remote controller (optional) is connected, this function is restricted.

## **10°C HEAT OPERATION**

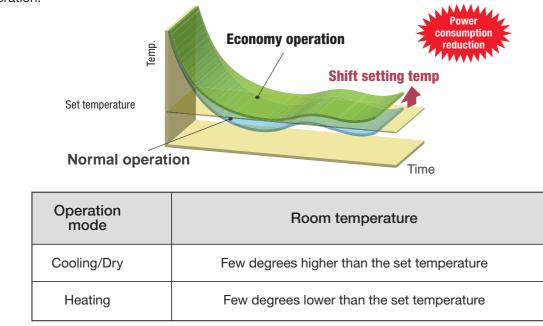

### **Economy Mode**

This mode saves more electricity than other operation modes by changing the set temperature to a moderate setting. In the Cooling, Heating, or Dry mode, the maximum output of this operation is approximately 70% of usual operation.

**ECONOMY** 

MODE

### 24°C Default Temperature Setting

The Bureau of Energy Efficiency has mandated default setting of 24°C for air conditioners with the objective of conserving energy. Therefore, when the air conditioner is switched on, it will have a preset temperature of 24°C. However, the user can set the air conditioner at a lower or higher temperature as per their preference. It is estimated that every 1°C increase in set temperature saves about 6% of electricity. Typically, room temperature is set between 20-21°C whereas, as per standard comfort conditions, ideal temperature is 24-25°C. Considering change from 20°C to 24°C, there is potential to increase at least 4 degrees Celsius, which will lead to savings of about 24% of electricity.

Overall potential for energy conservation through such measures is estimated to the tune of 20 billion units (worth ₹ 10000 crores) annually, which is equivalent to reduction of 16.4 million tonnes of  $CO_2$  per year.

## 24º C DEFAULT TEMPERATURE SETTING

## BEST IN CLASS WARRANTY & FREE INSTALLATION

### Best in class warranty & Free installation

General offers a 10 year warranty on Inverter compressor and a 5 year warranty on Inverter PCB. Free standard installation is offered on all split and inverter models bringing down the overall cost of ownership.

### Extended Comprehensive Cover

General offers an optional Extended Comprehensive Cover (ECC) for just ₹6990 (incl GST) for a period of 4 years after the completion of the 1st year comprehensive cover. The customer is entitled to avail 8 free periodic maintenance services over the 4 years. The ECC also covers all critical parts and offers free service visits in case of breakdown. Absolute peace of mind and long lasting performance for ₹4.79 per day only. Opting for ECC at the time of purchase, not only ensures priority service through General's wide service network and skilled manpower, but also prompt availability of genuine spare parts to safeguard the product for longer lifespan and optimum performance. Choose wisely and opt for ECC for your product.

For detailed terms & conditions regarding ECC, please scan QR code

Terms & Conditions apply. 10 years warranty on inverter compressor is on select models and includes 5 years standard warranty & 5 years extended warranty. 5 years warranty on inverter PCB is for the outdoor unit on select models and includes 1 year standard warranty & 4 years extended warranty. To avail extended warranty – a) Registration of product within 30 days of purchase & installation by authorised service partner is mandatory and subject to verification by the company; & b) Servicing & maintenance of product during warranty period at a nominal cost by authorised service partner is mandatory. For product registration, call 1860 2081 007 or WhatsApp 6379 881 007 or register through our General Air Conditioner Customer Mobile App. Extended warranty is valid against installation by authorised service partner and subject to verification by the company. Refer warranty can't for more details.

## EXTENDED COMPEHENSIVE COVER

57

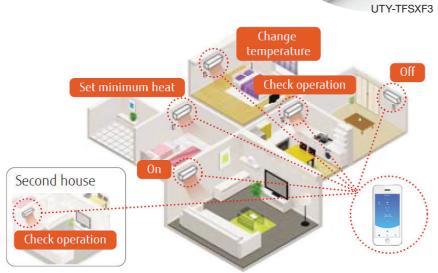

#### **Operation from anywhere**

Using the Internet of Things (IoT). Fujitsu General actively provides services that allow users to control air conditioners from thier smartphones. By using our Wireless LAN Interface and "FGLair" app, you can control your home's cooling and heating anytime and anywhere.

#### Wireless LAN Interface

The exclusive Wireless LAN adaptor (optional accessory) enables to operate the air conditioner by smartphone or tablet PC from outside.

"FGLair" is an application software that enables you to operate your General air conditioner with a mobile device and control your home's climate anytime, anywhere!

#### User friendly interface

User friendly screen display facilitates easy operation.

Note: FGLair App can be used only if the Wireless LAN adaptor is installed.

360° Turbo Flow 360

6 Row Coil Enables faster and efficient cooling.

Connectable Distributing Duct

Indicates the filter cleaning period by lamp.

Filter Sian

Condenser Protection Grill

Wireless Remote Controller

For ease of operation.

Protects the condenser from damage

Different ON-OFF times can be set for each day. Self Diagnosis

Since the front panel is easy to remove Washable maintenance is also easy.

Up / Down Swing Flaps The up/down flaps automatically swing up and down. Un/Down

- Tropical Spec
- Tropical design for high ambient operation upto 55°C.
- To protect the coil from damages due to sun and sand.
  - Mildew Resistant Filter Prevents mold formation.
- Connectable Fresh Air Duct Fresh air can be introduced into the configuration
- Left / Right Swing Flaps LIR

S= Fresh Air Intake Fresh air can be taken in by a fan which can be connected using

Weekly + Setback timer Weekly + Setback timer can set temperature for two time spans W+S and for each day of the week.

POWER Power Airflow Dual Flaps Can flatten out during cooling operation to deliver cool air to the corners of the room. DUAL

Dry Function Automatically reduces the level of humidity and maintains the

preset temperature.

- BLDC Motor Indoor Unit Specially designed Brushless DC motor for smooth & energy efficient operation.
- Inner Groove Copper Tube IGT copper tube heat exchanger ensures better performance.

fine particles and dust in the air. Program Timer

This digital timer allows selection of one of four options: ON OFE  $ON \rightarrow OFE$  or  $OFE \rightarrow ON$ 

Long Pipe Easy and extended location of indoor unit to outdoor ЬП unit with full efficiency.

Cold air is discharged along the ceiling and is delivered far away for long reach and comfortable cooling, avoiding direct air blast on body.

Saving

Energy Saving mode This mode raises the set temperature slightly in the cooling mode to economically control the operation of the unit.

High Voltage Protection Designed to withstand surge voltage and prevents the PCB from breakdown.

Human Sensor

Human sensor detects movement of people in the room and judges whether energy saving operation is required or not.

Wide Angle Louvers Smoothly curved wide angle louvers provide wide airflow coverage for effective cooling independent of indoor unit placement in room.

گ

Save

WIDE ANGLE

...

Ŧ

Dual suction Intake Design Warm air is sucked in through dual intakes enabling larger volume of air to be cooled for fast and effective cooling.

Economy Mode Limits the maximum operation current, and performs operations with the power consumption suppressed.

High efficiency fan construction and large independently driven diffuser ensures quiet operation.

The outdoor unit's heat exchanger fins are processed with special coating to avoid salt and acid corrosion

Integrated ON-OFF Timer

ODU Low Noise Operation of compressor and outdoor fan

Sleep Timer

82

- Tropical design for high ambient operation upto 52°C.
- Advanced Hyper Tropical spec
- Rear Cabinet Protection

Fresh

Wired Remote Controller Programmable wired remote, for ease of operation in busy ercial spaces

from corrosion.

with an epoxy resin.

Powder Coated Outdoor Unit

Powder coated body ensures extra protection

Anti Corrosion Heat Exchanger in IDU

Prevents refrigerant leak by coating the heat exchanger

A number of indoor units can be operated at the

same time using a wired remote controller

Tropical design for high ambient operation upto 50°C.

Group Control System

Sensor Function

Auto Restart

In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.

# **FEATURE EXPLANATION**

The exclusive Wireless LAN adaptor (optional accessory) enables to operate the air conditioner by smartphone or tablet PC.

#### Blue Fin Condenser

Adoption of strong blue fin hydrophillic coated condenser provides protection against rust and salt damage.

AFM Technology

Advanced Frequency Modulation Technology provides higher efficiency and better performanceof the compressor.

Cleans the air by catching particles as small as 0.3 ~ 2.5 µm.

Double Swing Automatic - 3D Enables automatic swing in both horizontal and vertical directions, which enables 30 unique configurations

The remote controller automatically adjusts the indoor temperature according to the detected ambient temperature.

Automatic Airflow Adjustment The micro-computer automatically adjusts the airflow effectively to follow the changes in room temperature.

The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep

Powerful Mode

Opens at maximum fanspeed for 20 minutes for highest air circulation and faster cooling

Lowers noise from outdoor unit by decreasing rotation speed

	2	T	_	
Q			Ì	ĺ
_				

Backlit Remote Backlit display on wireless remote controller enables easy operation in a darked room.

Temperature Display Displays indoor set temperature and indoor ambient temperature on the indoor unit.

with dust and impurities.

Coil Cleaning Function

Indoor fan will operate at low speed for a while after turning off the unit by remote controller to prevent mold formation by drying the indoor unit heat exchanger.

#### Auto Moisture Prevent

In Cool / Dry mode if the vertical air direction louvers are operated outside the operating range of (1) - (3) for more than 20 minutes, they will automatically return to the (3) level in order to prevent moisture condensation and water dripping from the air outlet. This can be disabled by following simple steps as mentioned in the operation manual

Blue Fin Evaporator

10°C Heat Operation

0.5°C Precision Temperature Control Allows setting desired temperature in increments of 0.5°C for more accurate temperature setting.

Adoption of strong blue fin hydrophilic coated evaporator provides protection against corrosion.

Maintains the room temperature at 10°C, thus preventing the

room temperature from dropping too low when not occupied

Cleans the indoor unit heat exchanger by freezing the outer

surface and then melting and flushing out the water along
